Isro to launch Indian space shuttle soon

Thiruvananthapuram, May 15

FOR the very first time in its history the Indian Space Research Organisation (Isro) is actually growing wings as it embarks this month on a never before space flight that would make history. The Indian space agency is all set to undertake the maiden launch of its very own indigenously version of a 'space shuttle', a fully reusable launch vehicle in India effort.

Today, a sleek winged body almost the weight size of a sports utility vehicle (SUV) is being given final touches at Sriharikota awaiting the final countdown.

Yes, the big powers abandoned the idea of a winged reusable launch vehicle but India's frugal engineers believe the design to reduce cost of launching satellites into orbit is to recycle the rocket make it reusable. Scientists at ISRO believe that they could reduce the cost of launching stuff into space by as much as 10 times if reusable technology succeeds, bringing it down to \$2,000 per kg.

Artists' impression of India's first indigenous space shuttle

Very soon and if all goes well possibly before the monsoons sets in, India's space port at Sriharikota on the coast of Bay of Bengal in Andhra Pradesh will witness the launch of the indigenously made Reusable Launch Vehicle—Technology Demonstrator (RLV-TD). This will be the first time Isro will launch a spacecraft, which actually has delta wings and after launch, it will be glided back onto a virtual runway in Bay of Bengal.

The RLV-TD is unlikely to be recovered from sea during this experiment as it is expected that the vehicle will disintegrate on impact with water since it is not designed to do so. The purpose of the experi-

ment is not to see it float, but to glide and navigate from a velocity five times higher than the speed of sound onto a designated virtual runway in the Bay of Bengal some 500 km from the coast.

Very similar in its looks to the American space shuttle, the RLV-TD being experimented is a scale model which is almost six times smaller than the final version.

K Sivan, director of the Vikram Sarabhai Space Centre, Thiruvananthapuram, says, "These are just the first baby steps towards the big Hanuman leap."

The final version will take at least 10-15 years to get ready. PTT

EPFO may invest over ₹6,000 cr in equity market in 2016-17

Hyderabad, May 15:

Union labour minister Randu Datatreya has said the Employees Provident Fund Organisation (EPFO) may invest more than ₹6,000 crore in equity market during the current financial year.

The minister, however, said a final decision will be taken by the Central Board of Trustees at the next meeting.

Last year, EPFO had invested about ₹6,000 crore through SBI Mutual Fund's two index-linked ETFs (exchange-traded funds)—one to BSE's Sensex and the other NSE's Nifty.

"It (investments into ETFs) may increase over last year because it will yield benefits in the long run even if there is no benefit in the short term. Last year, we had invested ₹6,000 crore. This year, we may invest more than that. There was discussion with bankers and investment managers and officials from BSE and NSE," Datatreya said on the sidelines of a programme on Sunday.

The finance ministry had last year notified a new investment pattern for EPFO, allowing the body to invest a minimum of 5% and up to 15% of its funds in equity or equity-related schemes.

However, the EPFO management decided to invest 5% of its incremental de-

According to the labour minister, the pension body has so far invested ₹5,800 cr in shares of state-owned oil companies

positions in ETFs only during the last year, the minister added.

"Our ministry has prepared a report on the investment performance. We will study that report also. Based on that report, we will decide how much to invest in ETF and shares of PSUs. We will take a decision on whether to increase the investments in stock markets, and if so, how much," he explained.

According to Datatreya, the pension body has so far invested ₹5,800 crore in shares of state-owned oil companies. PTT

Slowdown in Africa, LatAm hits auto exports

New Delhi, May 15: Automobile exports from India plunged 15.87% to 2.44 lakh units in April due to continuing demand slump in major overseas markets of Africa and Latin America.

According to the latest data of Society of Indian Automobile Manufacturers (SIAM), the domestic industry had shipped 2.90 lakh units in the same month last year. It is after three months of growth that automobile exports fell last month. In January shipments had grown by 3.8%, 0.96% in February and 6.53% in March.

"Exports have declined overall. Every segment seems to have gone down and that is largely because African and Latin American markets are facing a lot of challenges right now," SIAM director general Vishnu Mathur said. Elaborating further he said, decline in commodity exports, downward spiral in crude prices have led to a decline in income in the African markets. "In Latin America, their currencies have been badly hit due to inflation. Therefore, the purchasing power of people has gone down there," he added. PTT

CIL invites global firms for consultancy on coal gasification

New Delhi, May 15:

State-owned CIL's consultancy arm CMPPI has invited applications from global firms for providing consultancy on formulating bid documents with regard to development of underground coal gasification projects.

The development of underground coal gasification (UCG) is envisaged to provide energy security.

Tenders are invited from the reputed and experienced consultancy firms/organisations for... formulation of bid document and model Contract Document for Development of Underground Coal Gasification (UCG), the Central Mine Planning and Development Institute (CMPDI) said on its website.

"The bidder must have successfully completed at least two works of formulation of Model Contract Document and Bid Document for development and allocation for projects of UCG/Coalbed Methane/Coal Mine Methane exploration and production (E&P) sector of Oil & Natural Gas/State Gas holders during last ten years period," the bid document said.

The Union Cabinet earlier approved a policy for development of Underground Coal Gasification in coal and lignite bearing areas in the country. PTT

Railways to lay track for trial of high-speed trains

New Delhi, May 15:

In a first for Indian Railway, the public sector transporter is laying a 20-km long test track, equipped with a state-of-the-art laboratory near Rajpur for trial of high-speed and regular trains to plan its introduction.

Besides new locomotives and coaches, the test track will also be used for trial of high axle load wagons. Currently, the trial of new trains are conducted on the existing rail network causing traffic delays, said a senior railway ministry official, adding the trucks are not equipped to help simulation of all test conditions.

"Test tracks are used for trial run of new trains in countries, including the US, Japan and South Korea. In India, a section of the railway network is cordoned off and no train movement is allowed whenever new trains are introduced, causing traffic disruption and delay in operations.

The 20-km test track, including a 5-km loop line, will be developed at an estimated cost of about ₹100 crore. PTT
